

04.01.13

IMPACT UPDATE!

Building dignity for rural cancer care.

- **115 Jobs Created**
- **25 Jobs Created through Poverty Reduction Task Force.**
- **Dual systems of low velocity fans and ventilation allow for an estimated 12 air changes per hour.**

Roof is lifted to maximize window size for optimal ventilation and light.

A PARTNERS IN HEALTH PROJECT

PROFILE

SAMUEL KAVUTSE

“A well designed hospital building is needed for the interaction between patients and doctors. Patients also need good relief when they are waiting for doctors with comfortable, well designed seats.”

Samuel comes from a pygmy neighborhood with very limited resources and opportunities. As part of a joint task force with PIH and Burera District to reduce poverty, Samuel was hired as a simple helper and as a result he has invested his wages in livestock to ensure food security for his family.

Next month we will be installing doors and windows...
